

KJ6HCG Glenn Amateur Radio Society Winter Field Day 2024

We are pleased to announce that the Glenn Amateur Radio Society is putting on a winter Field Day event on January 27, 2024. This Year's location will be the Spurlock Ranch off of State Highway 162 in Elk Creek CA 95939.

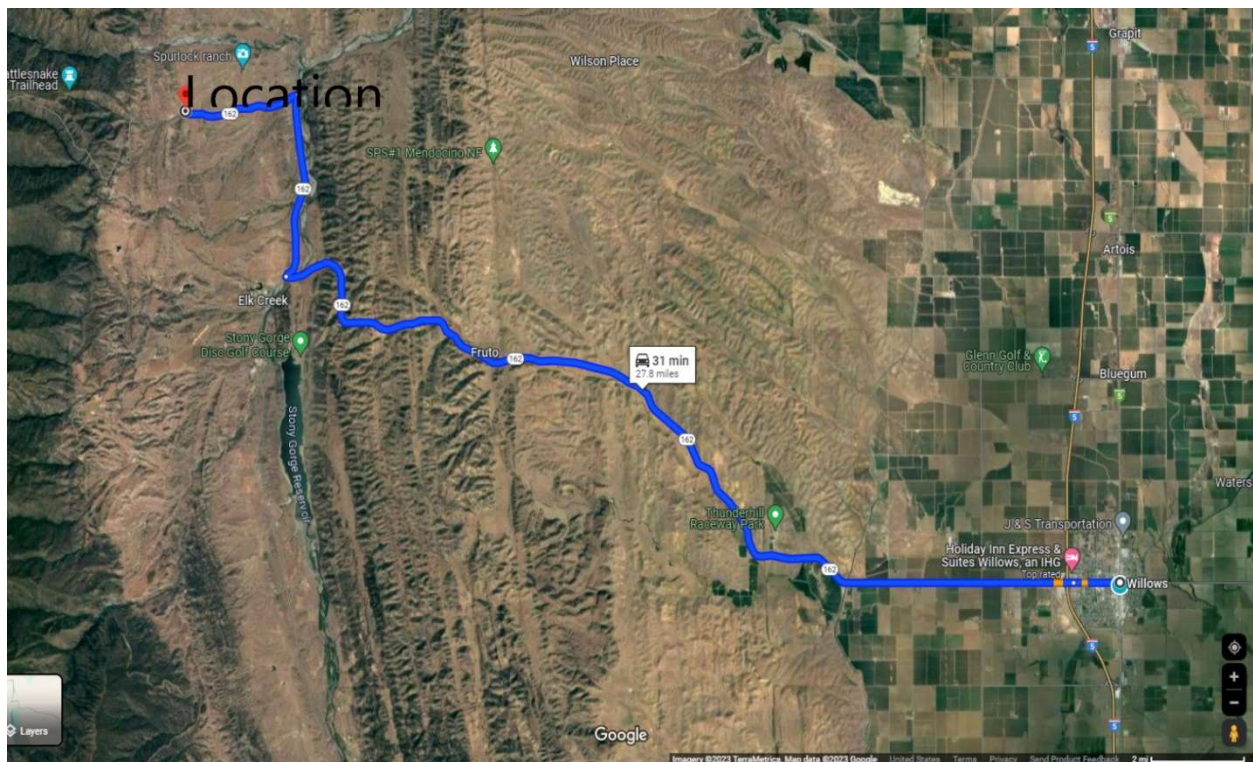

The event will be held on Saturday January 27, 2024 from 7:30 AM until finished we have no plans at this time for Sunday operations on Sunday morning this could change with the desires of the membership/participants. **Dry Camping is available for those from out of town it will be available for Saturday night. As always if you pack it in, please pack it out!** It is unknown if any group meals will be provided at this point. I believe we will have hot coffee available.

In the case of rain, we may make use of the fellowship hall at Saint Paul's Lutheran Church in Artois CA as an alternate location this is only in the case of bad weather. (This would be a last resort option at this point).

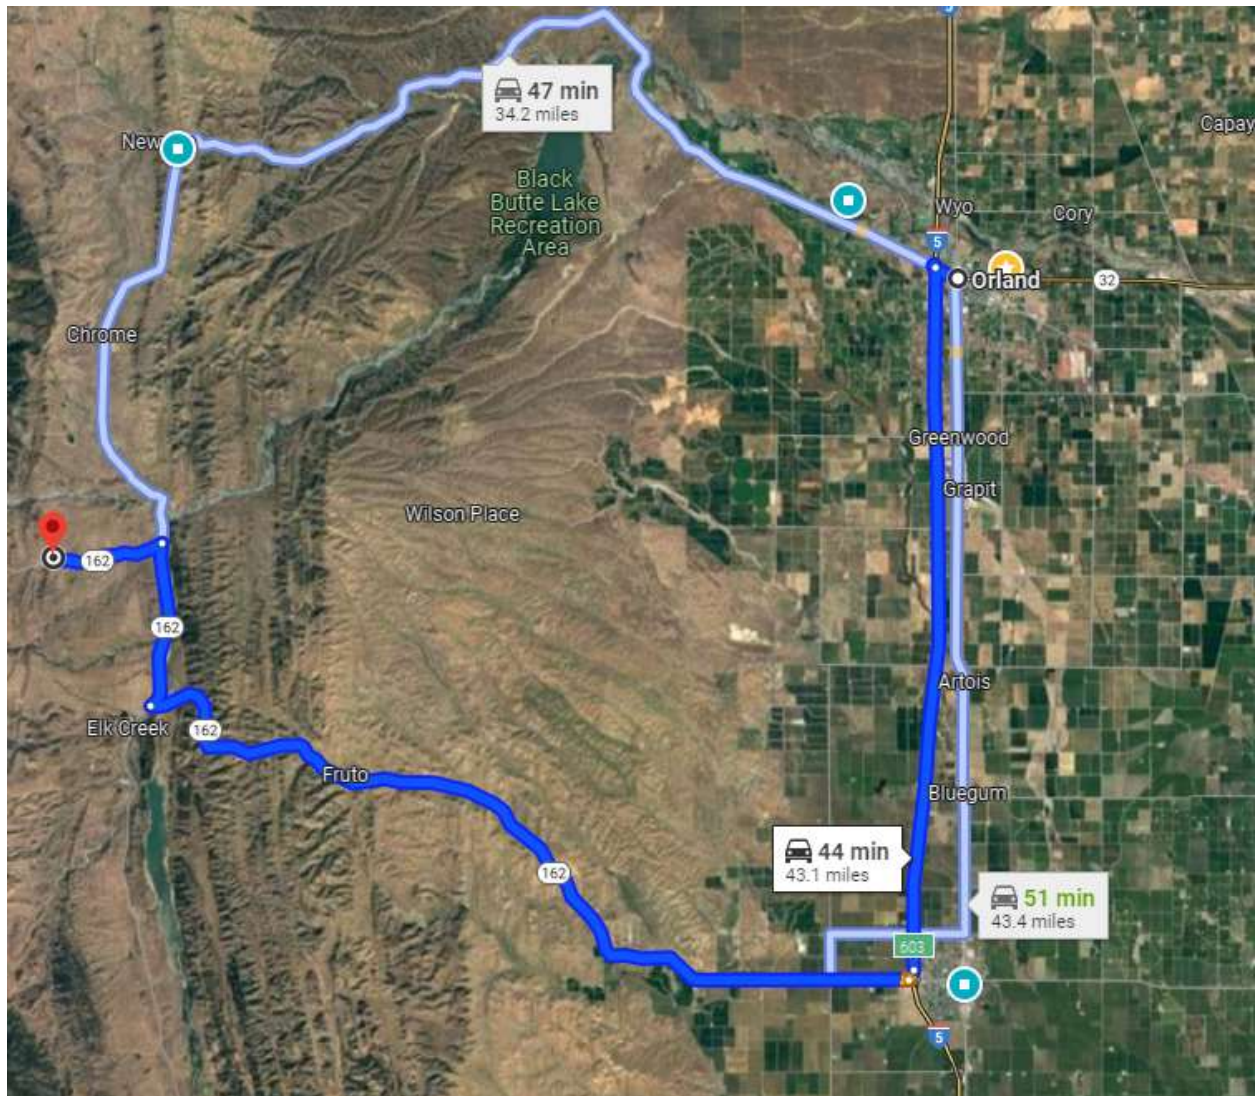

Radio Operations this site is going to be limited to 2-3 HF Radio Setups as the site is small and our club lacks band pass filtering still. Station 1 will be the Disaster response trailer station 2 will be up to whoever wants to bring and setup a station/antenna. I am unsure how well this location will work for VHF/UHF simplex work as it is not at a high elevation. There is room for VHF/UHF Yagi's/beams on masts here as well or satellite operations as well.

We expect we will have less than 15 participants but I hope that is wrong! All guests from Neighboring clubs are welcome to attend and participate. We also welcome all licensed and unlicensed interested individuals to come check out what we are doing this day.

Location

Directions From Willows California to the Location. GPS Coordinates are: 39.6586446, -122.5710103

Directions From Orland California.

This is the actual Location of the event.
